Dietary Options and Customizations:

Does Marcy's Kitchen offer vegetarian or vegan options on the menu?

- For vegan options, while our menu isn't extensive, you'll find that our guacamole and chips are vegan-friendly. You can enjoy our veggie tacos by simply requesting no cheese, featuring corn tortillas filled with yellow and green squash, peppers, and onions. Similarly, our veggie burrito, filled with pinto beans, yellow rice, and the same veggies, can be made without cheese. Additionally, our veggie fajita, consisting of sautéed veggies with yellow rice and black beans on the side, can be prepared without cheese.
- For vegetarians, we offer a wider selection, including veggie tacos, veggie burritos, veggie quesadillas, veggie fajitas, and veggie enchiladas. You can also try our Oaxaca Cheese Empanada and enjoy our guacamole and chips. To satisfy your sweet tooth, treat yourself to a slice of Tres Leches, Nutella Nachos, or Churros for dessert.

Does Marcy's Kitchen offer gluten-free options?

- On our menu, gluten-containing items include flour tortillas served as a side with fajitas, the wraps for our burritos, our empanadas, and Nutella nachos. However, our tacos are served with corn tortillas, as well as our packed chips, nacho orders, chilaquiles, enchiladas, and tostadas, all of which are gluten-free options.

Can I customize my order at Marcy's Kitchen?

- Absolutely, you have the flexibility to customize your order by omitting specific ingredients, such as requesting no cilantro or onions in your tacos, no cheese or beans in your burrito, or no glaze on your mango salad with salmon. However, due to limited space and potential complications, especially during peak hours, organizing customizations can be challenging. While we understand individual preferences, during busy times, accommodating extensive changes becomes difficult. Our kitchen staff is already managing numerous orders, and allowing too many customizations can lead to mistakes or a less-than-optimal customer experience. We appreciate your understanding and recommend keeping customizations to a minimum, but will do our utmost best especially if they are health-related.
